

Parts of a plant

Grade 2 Science Worksheet

Complete the paragraph about plants.

roots

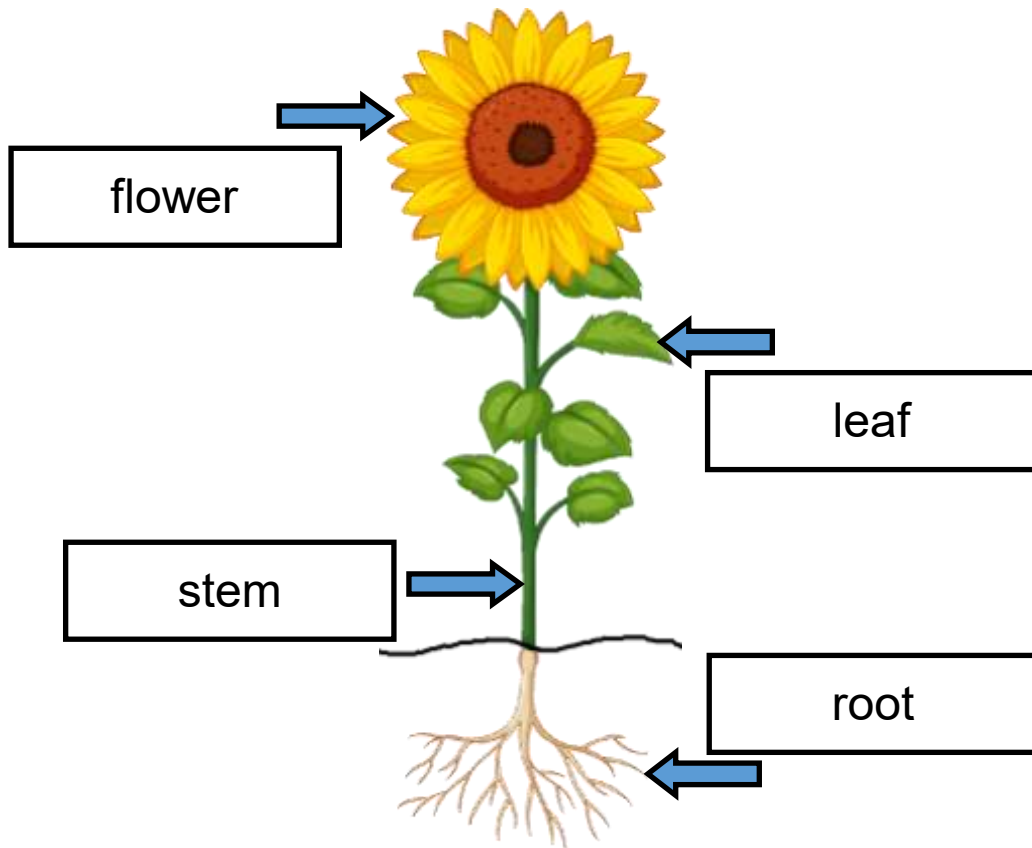

stem

leaves

flower

_____ soak up water and minerals for the plant. The _____ supports the plant and keeps it in the sunshine. The _____ absorb sunlight and water and create food for the plant. The _____ creates seeds for new plants to grow from.

Answers

roots

stem

leaves

flower

Roots soak up water and minerals for the plant. The stem supports the plant and keeps it in the sunshine. The leaves absorb sunlight and water and create food for the plant. The flower creates seeds for new plants to grow from.
